

EASA Certification Information

No.: 2014 - 03
Issued: 21 February 2014

Subject: Request for partial surrender of Type Certificate EASA.A.064 affecting aircraft model A320-111

Type Certificate No: EASA.A.064 (Model A320-111 only)

Issue date: 26 February 1988

Issued by: Initial approval issued by DGAC-F, currently under EASA TC EASA.A.064 Iss.3 issued by European Aviation Safety Agency

Holder of the Certificate: Airbus
EASA.21J.031

Background:

The current Holder of Type Certificate (TC) EASA.A.064 has requested EASA to delete the approval for A320 model A320-111, based upon the fact that all produced aircraft are permanently out of service no new aircraft of that model will be built.

EASA hereby asks you to communicate the aforementioned request to any natural or legal person to whom this surrender could be of direct and individual concern as well as to other possible interested persons.

After satisfactory evaluation of the request, EASA has accepted the request and will take the decision to partially revoke the TC, in accordance with the applicable EASA administrative procedures. As part of this process, EASA will amend and re-issue the TC for the A318/A319/A320/A321 aircraft (EASA.A.064) with the updated list of valid certified models.

Consequence:

In relation to the A320-111 aircraft model, Airbus will no longer provide any support and any aircraft registered in an EU Member State will no longer be eligible for a normal Certificate of Airworthiness according to Article 5(c) of Regulation (EC) No. 216/2008.

Contact: Any request, query or comment shall be sent **no later than Friday 7th of March 2014** to:
