

**FAQs:**

[Delegation of tasks](#), [Information Security \(Part-IS\)](#)

**Question:**

**Does the organisation need to establish a separate representative for the information security management system (ISMS)?**

**Answer:**

This is an organisational decision depending on the necessary competencies that this person needs to have. The accountable manager may decide to delegate certain responsibilities to a person or group of persons, taking into account their competencies and the requirements detailed in point IS.OR.240 and the related acceptable means of compliance and guidance material (AMC & GM).
