

Working Arrangement

between

The Civil Aviation Administration of China (CAAC)

and

The European Aviation Safety Agency (EASA)

**On validation by CAAC of the Supplemental Type
Certificate No. EASA.A.S.02886**

The European Aviation Safety Agency (EASA) and the Civil Aviation Administration of China (CAAC) hereinafter referred to as the "Authorities",

Considering the common interest of EASA and CAAC to preserve aviation safety and environmental compatibility,

Willing to reduce the economic burden imposed on the aviation industry by redundant technical inspections, evaluations and testing,

Being entitled by their respective constituting acts to conclude Working Arrangements¹ in their field of competence,

Have agreed the present Working Arrangement:

1. PURPOSE AND SCOPE

1.1 This Working Arrangement defines the working relationship between EASA and CAAC to facilitate and accomplish the CAAC validation of a supplemental type certificate issued by EASA.

1.2 This Working Arrangement applies to the validation of the STC No. EASA.A S.02886² (STC holder, Lufthansa Technik AG)

2. OBJECTIVES

This Working Arrangement intends to define the working procedures under the respective responsibilities of each authority:

- a) For the validation of the Supplemental Type Certificate (STC) and subsequent post type validation activities;
- b) To co-operate on ensuring the continued airworthiness of the Lufthansa Technik AG referenced STC

¹ For EASA Article 27(2) to Regulation (EC) No 216/2008 of the European Parliament and of the Council of 20 February 2008 on common rules in the field of civil aviation and establishing a European Aviation Safety Agency. OJ L 79, 19 3 2008, p. 1

For CAAC the requirements for this Working Arrangement result from paragraph 2.2 of CAAC AP 21-01 R2 dated 12 October 2006 (English version) "Validation Procedures for Import Civil Aviation Products and Parts".

² Description: Introduction of Self-Illuminating Floor path Marking System "Cloured Guideline" PL88-900 series. Date of issue 20 December 2006. Model Boeing 757-200, Boeing 757-300

3. COMMUNICATION

- 3.1** The Aircraft Airworthiness Certification Department of CAAC (CAAC-AAD) and the EASA Certification Directorate, being the STC certification authority, will be responsible for the implementation of this Working Arrangement.
- 3.2** A focal point will be assigned by each Authority to facilitate the implementation of this Working Arrangement. All routine communication will take place between these focal points (see Appendix). The list of focal points will be amended as agreed by the authorities, by exchange of letters.
- 3.3** All communications between the Authorities related to the activities of this Working Arrangement will be made in English language.
- 3.4** Unless otherwise specified, EASA shall be copied with all correspondence between the applicant and CAAC related to the activities of the considered project conducted under the provisions of this Working Arrangement in order for EASA to support the applicant and the CAAC where necessary pursuant to this Working Arrangement.

4. SUPPLEMENTAL TYPE-CERTIFICATE VALIDATION PROCESS

4.1 Application

EASA will forward the application for STC validation and related information to CAAC

4.2 Supplemental Type Certificate Validation

- 4.2.1** EASA will assist the CAAC in getting familiarised with the design of the STC with the assistance of the EASA STC holders (applicant) and explain in particular the reasons for possible EASA special conditions and equivalent safety findings, as well as the process followed for their adoption.
- 4.2.2** CAAC will make available to EASA their type validation basis in order that EASA can ensure that the EASA STC meets the CAAC requirements for the product. EASA will advise CAAC if any additional substantiation is needed to meet the CAAC requirements. If additional requirements, related to EASA certification basis exists, then the CAAC will be asked to specify additional technical conditions.
- 4.2.3** The CAAC will accept the findings and approvals of EASA, unless notified formally as subjects to be retained against additional technical conditions defined under 4.2.2.

4.2.4 The CAAC will assist EASA in understanding and applying its additional technical conditions. Subject to availability of resources and the required technical expertise, EASA will assist CAAC, upon request, in evaluating compliance with its additional technical conditions. It may in this context, at the request of CAAC, evaluate whether the data submitted by the EASA TC holder demonstrates compliance with the CAAC additional technical conditions.

4.2.5 The CAAC will make the compliance determination with its requirements and will be responsible for the issuance of a Validation Supplemental Type Certificate on the basis of that determination.

5. ACCEPTANCE OF CHANGES AND REPAIRS

5.1 For design changes and repairs affecting CAAC validation supplemental type certification basis (such as, new application requirements, ELOS³ and deviations) or requiring validated TCDS amendment, application needs to be made to the CAAC. CAAC will determine acceptance of that data under the CAAC authorised system.

5.2 The CAAC will accept without further action any other design changes and repairs under the validated STC, designed by the validated STC holder, and approved by EASA or by the EASA approved design organisation for which CAAC has issued a validated STC.

6. AIRWORTHINESS SUPPORT ACTIVITIES

- a) In accordance with ICAO Annex 8, EASA will inform CAAC of all mandatory airworthiness modifications, special inspections, special operating limitations or other actions necessary for maintaining the airworthiness of the STC No. EASA.A.S.02886 (STC holder, Lufthansa Technik AG).
- b) CAAC will promptly notify EASA and the applicant of any unsafe condition including occurrences⁴ associated with the design or manufacturing concerning the STC No. EASA.A.S.02886 (STC holder, Lufthansa Technik AG) for products that are in service in China. On the basis of the information provided by CAAC, EASA in its capacity of State of Design airworthiness authority will analyse in coordination with the applicant the in service event and will notify CAAC, where appropriate, of any corrective action it deems necessary for maintaining the airworthiness of the STC No. EASA.A.S.02886 (STC holder, Lufthansa Technik AG).

³ Equivalent level of safety.

⁴ For the purpose of this Working Arrangement, occurrences, means: An operational interruption, defect, fault or other irregular circumstance that has or may influenced flight safety and has not resulted in an accident or serious incident.

7. ENTRY INTO FORCE, INTERPRETATION, AMENDMENT, DURATION AND TERMINATION

7.1 Entry into force

This Working Arrangement shall enter into force at the date of signature by the Authorities' duly authorised representatives. When the signature process is performed by exchange of letters, the Working Arrangement shall enter into force at the date of the last signature of the Authorities' duly authorised representatives.

7.2 Interpretation and amendment

Any disagreement regarding the interpretation or application of this Working Arrangement will be resolved by consultation between the Authorities.

This Working Arrangement may be amended by mutual consent. Such amendments shall be in writing and shall enter into force at the date of the last signature of the Authorities' duly authorised representatives or its designees.

7.3 Duration and termination

This Working Arrangement will remain in force until terminated by either Authority upon prior notice.

Either Authority may at any time give written notice to the other Authority of its decision to terminate this Working Arrangement. This Working Arrangement shall terminate three months following the receipt of the notice by the other Authority, unless the said notice has been withdrawn by mutual agreement before the expiry of the three months period.

The Authorities agree to the provisions of this Working Arrangement as indicated by their duly authorised representatives
