Spain	Madrid-Barajas Airport	LEMD	large
	Palma de Mallorca Airport	LEPA	medium
	Ibiza Airport	LEIB	medium

Rule (see Terms of Reference) by which aerodromes were proposed:

EASA would like the Contractor to visit up to three pre-agreed aerodromes open to public use in each of the countries. Here the following rule should apply:

- Three aerodromes (one large, two medium or one medium and one small) when the country has more than 20 million inhabitants;
- Two aerodromes (one large, one medium) when the country has between 5 and 20 million inhabitants;
- One aerodrome (the most important in the country) when the country has below 5 million inhabitants
