

## Review visit by EASA in the field of initial airworthiness

From 16 to 19 April 2018 EASA conducted a review visit to the State Aviation Administration of Ukraine (SAAU) and the Ukrainian industry (Motor Sich, Ivchenko Progress) to verify the progress made in the implementation of the actions listed in the Convergence Document. The visit also addressed the verification of the current levels of EU-based rule implementation in the field of engine certification.

The visit was held in an open atmosphere and allowed the EASA team to identify some areas of improvement in the domains of design and production organisation oversight and Type Certification.
