

Impact of the pandemic on the safety landscape

Some key changes impacting safety

Before		Now
<ul style="list-style-type: none">• Stable aviation eco-system• Identification of weak signals in a very safe system• Fight complacency		<ul style="list-style-type: none">• Fluid and uncertain eco-system• Identification of new emerging risks (no or few data)• Ensure focus remains on safety

What was done

- Activation of the existing safety collaborative networks to establish the **COVID-19 Safety Risk Portfolio** i.e. identification of all the new systemic risks.
- This portfolio was **developed** in a record time **with all safety partners, from both industry and national aviation authorities, in a collaborative manner.**

No compromise on safety - COVID-19 Risk Portfolio (main categories of risks identified)
