

EASA's Principles

What is important to us as One EASA

Strategic Themes

01

**Maintain a
safe, secure
and resilient
aviation
ecosystem**

02

**Enable all
domains to
share one
airspace**

03

**Integrate
future
technologies
safely**

04

**Take clear
action on
society's
environmental
expectations**

05

**Collaborate
openly on
future
workforce
challenges**

Strategic Themes

01

Maintain a safe, secure and resilient aviation ecosystem

By ensuring that European safety and oversight standards effectively mitigate all risks affecting safety using safe products that perform as expected as part of a competitive industry.

02

Enable all domains to share one airspace

By providing a unified, safe and harmonised airspace where all users can see each other, be seen and ensure safe separation.

03

Integrate future technologies safely

By developing a regulatory framework and certification approach that ensures the aviation system can safely keep pace with technological advancements.

04

Take clear action on society's environmental expectations

By enabling the technical, operational and fueling capabilities required to become net zero by 2050 and mitigate non-CO2 emissions

05

Collaborate openly on future workforce challenges

By working together to deal with future workforce challenges set against a landscape of rapid digital transition and reduced financial resources.
