

APPENDIX I AIRCRAFT TYPE RATINGS FOR PART-66 AIRCRAFT MAINTENANCE LICENCE

The following aircraft type ratings should be used to ensure a common standard throughout the Member States.

The inclusion of an aircraft type in the licence does not indicate that the aircraft type has been granted a type certificate under the Basic Regulation and its Implementing Rules, this list is only intended for the maintenance purposes.

In order to keep this list current and type ratings consistent, such information should be first passed on to the Agency via [contact us](#) in case a Member State needs to issue a type rating that is not included in this list.

Notes on when the licences should be modified:

When a modification is introduced by this Decision to an aircraft type rating or to an engine designation in the rating which affect licences already issued, the ratings on the AML licences may be modified at next renewal or when the licence is re-issued, unless there is an urgent reason to modify the licence.

Notes on aircraft modified by STC:

- It is not the intention of this document to include all aircraft modified by STCs because a great number of STCs were approved before 2003 and are unknown to the Agency.
- When an aircraft has been modified by an STC for installation of another engine, the Part-66 type rating of this aircraft may change i.e. from Group 2 to Group 1. This is not reflected in this document. In case the applicant to a licence faces such a case, he/she or his/her competent authority can inform the Agency and a new type rating will be defined by the Agency.

In the following tables:

- The column '*TC Holder*' includes the TC holder as defined in the TCDS (EASA, FAA or other) or the Specific Airworthiness Specifications (SAS).
- Some TC holders' designations have been corrected to add the information :'*Aircraft with an SAS*', this means that the aircraft listed under this TC holder designation is considered an '*orphan aircraft*'.
- In Group 3, a third column has been added which is called '*Type of structure*' and which intends to assist the competent authorities in identifying the experience required for this type with a view on removing existing limitations on the licence.
- Wooden structure covered with fabric is considered to fall under wooden structure. For Aeroplanes with a combination of structures; e.g. metal tubing fuselage and wooden wings, both experience '*metal tube covered with fabric*' and '*wooden structure*' are required.

GROUP 1 AEROPLANES

TC holder	Model	Commercial designation	Part-66 Type rating endorsement
328 Support Services	328-100 series		Dornier 328-100 (PWC PW119)
