[Training requirements in the 'open' category](#) , [Open category](#), [Drones \(UAS\)](#), [Regulations](#)

Question:

Which training I need to fly my drone in the open category?

Answer:

The type of training required depends on the type of drone you use.

A transitional period **until December 31, 2023** applies, and each EASA Member State may define the appropriate remote pilot training requirements according to **the following table**:

WHAT TYPE OF DRONE CAN I FLY?					
Applicable until 01 of January 2014					
Operation		Drone Operator / pilot			
Max Take off mass	Subcategory	Operational restrictions	Drone Operator registration?	Remote pilot qualifications	Remote pilot minimum age
<250g 	A1 Not over assemblies of people <small>(can also fly in subcategory A3)</small>	Operational restrictions on the drone's use apply <small>(follow the QR code below)</small>	Yes No if toy or not fitted with camera/sensor 	Read user's manual	No minimum age <small>(certain conditions apply)</small>
<500g 			Yes	Check out the QR code below for the necessary qualifications to fly these drones	16
<2kg 	A2 Fly close to people <small>(can also fly in subcategory A3)</small>				
<25kg 	A3 Fly far from people

Remote pilot training as from 1 January 2024

The training requirements applicable as from January 1, 2024 are described below. However, most of the EASA Member States already offer the training listed below. In this way, you can already today receive a certificate according to the EU regulation. So, if you receive from an NAA of an EASA Member State one of the certificate of training with the EASA logo as shown below, you may already use it to operate your drone in the 'open' category in all EASA Member States. The training and exams can be conducted in an EASA Member State of your choice.
