

European Union Aviation Safety Agency

## FAQ n.139167

### FAQs:

[Categorisation of systems or equipment](#), [Air Traffic Management / Air Navigation Services \(ATM/ANS\) ground equipment](#), [Regulations](#)

### Question:

**We are still not sure, in which category some specific equipment falls and thus we would appreciate a more detailed allocation oversight of specific systems to categories (e.g. electr. flight strips; network equipment, Server HW, virtualisation and operating systems, used for all kinds of systems).**

### Answer:

First step is to assess the scope of the equipment and which function it supports. This assessment will determine the category to which it belongs.
