

European Union Aviation Safety Agency

## FAQ n.24266

### FAQs:

[Cybersecurity \(General\)](#)

### Question:

**What is CERT-EU, what is its role?**

### Answer:

The Computer Emergency Response Team for the EU Institutions, bodies and agencies (CERT-EU) is composed of IT security experts from the main EU Institutions. The CERT-EU cooperates with other CERTs in the Members States and with specialised IT security companies in order to respond to information security incidents and cyber threats.

A document providing basic information about the CERT-EU, its channel of communication, its roles and responsibilities has been published by CERT-EU and can be consulted. See [here](#)
