

Explanatory Note to Decision 2019/024/R

Update of Part-66 maintenance licenses type ratings (AMC and GM to Part-66 Issue 2 — Amendment 4)

RELATED NPA/CRD 2018-13— RMT.0541

EXECUTIVE SUMMARY

This Decision amends the acceptable means of compliance (AMC) and guidance material (GM) to Appendix I to Annex III to Commission Regulation EU No 1321/2014 (Part-66 list of aircraft type ratings for maintenance licences). It includes the new types that have been certified since the last update as well as the types related to the new categories of maintenance licenses introduced by Regulation (EU) 2019/1142.

The specific objective is to ensure a common standard throughout the Member States.

1 About this Decision

The European Union Aviation Safety Agency (EASA) developed ED Decision 2019/024/R in line with Regulation (EU) 2018/1139¹ ('Basic Regulation') and the Rulemaking Procedure².

This rulemaking activity is included in the European Plan for Aviation Safety (EPAS) [2019/2023](#) under rulemaking task (RMT).0541.

The draft text of this Decision has been developed based on the information released by the EASA Certification Directorate and the recommendations provided by the aircraft manufacturers.

All interested parties were consulted through Notice of Proposed Amendment (NPA) 2018-13³.

19 comments were received from all interested parties, including industry and national aviation authorities.

EASA reviewed the comments received during the consultation. The comments received and the EASA responses to them are presented in Comment-Response Document (CRD) 2018-13⁴

The final text of this Decision has been developed to amend Appendix I to AMC to Annex III to Commission Regulation EU 1321/2014.

The major milestones of this rulemaking activity are presented on the title page.

¹ Regulation (EU) 2018/1139 of the European Parliament and of the Council of 4 July 2018 on common rules in the field of civil aviation and establishing a European Union Aviation Safety Agency, and amending Regulations (EC) No 2111/2005, (EC) No 1008/2008, (EU) No 996/2010, (EU) No 376/2014 and Directives 2014/30/EU and 2014/53/EU of the European Parliament and of the Council, and repealing Regulations (EC) No 552/2004 and (EC) No 216/2008 of the European Parliament and of the Council and Council Regulation (EEC) No 3922/91 (OJ L 212, 22.8.2018, p. 1) (<https://eur-lex.europa.eu/legal-content/EN/TXT/?qid=1535612134845&uri=CELEX:32018R1139>).

² EASA is bound to follow a structured rulemaking process as required by Article 115(1) of Regulation (EU) 2018/1139. Such a process has been adopted by the EASA Management Board (MB) and is referred to as the 'Rulemaking Procedure'. See MB Decision No 18-2015 of 15 December 2015 replacing Decision 01/2012 concerning the procedure to be applied by EASA for the issuing of opinions, certification specifications and guidance material (<http://www.easa.europa.eu/the-agency/management-board/decisions/easa-mb-decision-18-2015-rulemaking-procedure>).

³ In accordance with Article 115 of Regulation (EU) 2018/1139 and Articles 6(3) and 7 of the Rulemaking Procedure.

2 In summary — why and what

2.1 Why we need to change the AMC.

EASA is responsible for defining the lists of aircraft types including identification of airframe/engine combinations included in each particular maintenance type rating.

The lists are presented in the Acceptable means of compliance (AMC) of Appendix I to Annex III (Part-66) to Commission Regulation (EU) 1321/2014.

On a regular basis, it is necessary to update the lists with new aircraft types and models that are certified or validated, or aircraft types that are withdrawn by EASA.

2.2 What we want to achieve

The overall objectives of the EASA system are defined in Article 1 of Regulation (EU) 2018/1139.

The specific objective of this proposal is to update the list of aircraft type ratings to be endorsed in the Part-66 maintenance license promoting a common standard throughout the Member States.

2.3 Overview of the amendments

This NPA introduces:

- updates of the type rating lists due to the addition of new models or deletion of old models that review the current EASA products type certificate/supplemental type certificate (TC/STC) lists;
- a new table for Group 1 Gas Airships other than ELA2;
- new tables for Group 4 aircraft;
- corrections of type certificate holder/supplemental type certificate holder (TCH/STCH) names, models, commercial designations, and type ratings according to the content of the related type certificate data sheet/supplemental type certificate data sheet (TCDS/STCDS);
- changes in the content of 'Notes' (e.g. addition of the operational suitability data (OSD) approval dates, STC references, ELA1/ELA2 info for aeroplanes and Group 4 aircraft); and
- corrections of typos or other minor errors.
