

**FAQs:**

[Airspace Usage requirements – DLS/CPDLC \(controller-pilot data link communication\)](#),  
[Airspace Usage requirements](#), [Regulations](#)

**Question:**

**Is my aircraft supposed to be able to record CPDLC communications?**

**Answer:**

On board recording of CPDLC messages is required, however, this depends upon age and operations undertaken.

For **European operators**, compliance with the communication recording capability in accordance with Regulation (EU) No 965/2012 is required for newly manufactured aircraft as follows:

- on or after 08 April 2014 for CAT operations
- on or after 01 January 2016 for other-than-CAT operations

For **Third Country Operators (TCO)**, compliance with the requirements of ICAO Annex 6 is required (i.e. newly manufactured aircraft on or after 01 January 2016 and new CPDLC installations).
