

FAQs:**Part 21, Supplemental Type Certificates****Question:**

How will the privilege of submitting compliance documents without further involvement be modified by the Level Of Involvement process?

Answer:

The point 21.A.263 (b) will be cancelled by the next amendment to Part-21 (ref to Opinion 07/2016).

According to the new concept, any application for major change/repair, STC, APU ETSO or TC submitted to the Agency shall be complemented by a risk-assessment and a LOI proposal prepared by the applicant. After acceptance of the Certification Program/LOI, data and activities not included in the EASA LOI will be accepted without further verification.
