

## Workshop on Medium Robustness - M2 MoC

*Hybrid event (partially online and partially on-site)*

**Organised by:** EASA

**Date:**

**22 Feb 2023**

**22/02/2023, 10:30 - 17:30 CET (UTC +1)**

---

### Location

#### **EASA Headquarters**

Konrad- Adenauer-Ufer 3

50668 Köln

Germany

[Presentation - Workshop on Medium Robustness - M2 MoC](#)

---

### Description

The workshop will be dedicated to discuss the Means of Compliance (MoC) on M2 medium robustness that EASA and Competent Authorities have prepared and is now available under EASA's product certification consultations, specifically: [Means of Compliance for mitigation means M2 Ref. AMC to article 11 of Regulation 2019/947](#)

The document is addressed to UAS operators, UAS manufacturers, mitigation means manufacturers (typically but not only: parachute recovery systems). The document is made of:

- **Chapter 1:** conceptual clarification of the nominal integrity target associated with medium

robustness M2;

- **Chapter 2:** General Means of Compliance for M2 medium robustness mitigation means. An applicant may use this chapter to define the technical approach for its project by proposing to the competent authority a specific MoC for M2 medium integrity;
- **Chapter 3:** An initial set of example ways to apply the general MoC.

Chapter 2 is particularly addressed to organizations designing the UAS and/or the mitigation means, chapter 3 is focused on operators.

The workshop is offered in hybrid form, however EASA encourages participation in person until maximum number of seats (60) is filled
