Description

The EASA Workshop is a unique forum to discuss the implementation of the new Conformity assessment framework for ATM/ANS systems and ATM/ANS constituents, from the application to the approval.

This event will provide overview on:

- the ATM/ANS equipment certification and declaration processes as facilitated by the proposed set of AMC/GM (NPA to be published soon),
- the proposed detailed specification that the organisations may use to demonstrate compliance towards ATM/ANS equipment certification or declaration, which is the novelty in the ATM/ANS domain, and

- the legal and procedural background information.

It will take place on 04 July 2023 at EASA Headquarters in Cologne, Germany in a hybrid format.
