DATAPP Project Webinars for flight data for evidence-based training, digital fuel management, and flight data models for safety — November 2023

Online

Organised by: EASA

Date:

14 Nov 2023 to **15 Nov 2023**

- **14/11/2023**, 10:00 - 11:30 CET (UTC +1): **Way forward on Flight training data to design and deliver effective EBT programmes**
- **14/11/2023**, 14:00 - 15:30 CET (UTC +1): **Transition to Digital fuel management based on statistical models and consumption data**
- **15/11/2023**, 10:00 - 11:30 CET (UTC +1): **Addressing the challenges of Flight data models for FDM and other safety processes**

Description

14-15 November 2023

Research continues the EASA DATAPP project for flight data for evidence-based training, digital fuel management, and flight data models for safety.

Join us on 14-15 November to learn more on the solution strategies proposed to bridge the gap between current limitations and the adoption of new technologies for data collection and analysis.

Registration

Register below for:

- Way forward on Flight training data to design and deliver effective EBT programmes
- Transition to Digital fuel management based on statistical models and consumption data
- Addressing the challenges of Flight data models for FDM and other safety processes
