Description

The European Commission, European Union Aviation Safety Agency (EASA), EUROCONTROL, SESAR Deployment Manager and SESAR 3 Joint Undertaking are jointly organising the world's first trajectory-based operations (TBO) symposium. The aim of the event is to showcase TBO's benefits and the progress being made in the realisation of the global TBO concept. The event will provide a forum for discussion and exchange on all aspects of TBO, including the operational benefits, concept, enablers, and the regulatory and

standardisation aspects.

Why should you attend this event?

- To hear from stakeholders who are already moving to implement TBO, and learn about their operational experiences and the benefits it is delivering for their day-to-day operations.
- To understand the key enablers that can support TBO, the necessary roadmap including regulatory and standardisation steps towards the future TBO operations.
- To discover the next steps and future technologies required for full TBO implementation on a global scale.
