On-site event

Organised by: EASA and Osprey Flight Solutions

Event Type: Conference

Date:

02 Jul 2024 to 04 Jul 2024

Location

Warsaw, Poland

Description

About the event

Announcing the inaugural [World Overflight Risk Conference 2024](#), presented by the European Union Aviation Safety Agency (EASA) and Osprey Flight Solutions. The event aims to unite the global aviation community, providing a platform to collectively address and navigate the dynamic challenges posed by overflight risk.

Why attend?

This educational event is specifically tailored to aviation organisations, operators, regulators, and insurers – essential stakeholders in advancing our collective understanding of, and strategic approach to, overflight risks. Being the first of its kind to guarantee participation and representation across all sectors at the organisational level, this event ensures a comprehensive and inclusive consideration of all perspectives and factors. As we commemorate the 10-year anniversary of the tragic downing of Flight MH17, this conference takes on added significance. To demonstrate our commitment to the global aviation community, the conference will be non-profit, with all profits directed towards the victims' associations of MH17 and PS752.

Key themes

- Strategic insights into overflight risk management
 - Collaboration and innovation for a safer operational environment
 - Addressing challenges in airspace near conflict zones
-
