

**FAQ n.19396****FAQs:**

[Approval of Flight Conditions, General Aviation](#)

**Question:**

**What is the EASA responsible for?**

**Answer:**

As described above, EASA is normally responsible for the approval of the flight conditions on the basis of which a permit to fly can be issued by the Competent Authority.

The Agency approves the Flight Conditions in cases related to the safety of the design, defined as follows:

1. the aircraft does not conform to an approved design; or
2. an Airworthiness Limitation, a Certification Maintenance Requirement or an Airworthiness Directive has not been complied with; or
3. the intended flight(s) are outside the approved envelope.
