

## **FAQ n.19396**

### **FAQs:**

Approval of Flight Conditions, General Aviation

### **Question:**

# What is the EASA responsible for?

#### **Answer:**

As described above, EASA is normally responsible for the approval of the flight conditions on the basis of which a permit to fly can be issued by the Competent Authority.

The Agency approves the Flight Conditions in cases related to the safety of the design, defined as follows:

- 1. the aircraft does not conform to an approved design; or
- 2. an Airworthiness Limitation, a Certification Maintenance Requirement or an Airworthiness Directive has not been complied with; or
- 3. the intended flight(s) are outside the approved envelope.
