Affected Airspace:

Syrian airspace, all altitudes.

Applicability:

Applies to operators

Description:

This CZIB is issued on the basis of information available to EU Member States and EU institutions. Due to the remaining hazardous security situation, with the presence of terrorist organisations and ongoing military operations, there is a risk of both intentional targeting and misidentification of civil aircraft. The presence of a wide range of ground-to-ground and dedicated anti-aviation weaponry poses a HIGH risk to operations at all flight altitudes.

Recommendation(s):

EASA recommends not to fly within the airspace over Syria at all altitudes and flight levels.

Operators should take this information and any other relevant information into account in their own risk assessments, alongside any available guidance or directions from their national authority as appropriate.

Latest operational information on 'Closures and warnings' issued by means of ICAO State Letters, NOTAMs, AICs/AIPs, EASA CZIB may be found in the [Network Manager NOP Portal](#) (password protected version).

Affected Countries:

Syria
