

European Union Aviation Safety Agency

FAQ n.43771

FAQs:

[Bilateral Agreement \(BASA\) - related to Continuing Airworthiness](#), [Continuing Airworthiness Regulations](#)

Question:

Can I import a rebuilt engine and associated components from US?

Answer:

Under the terms of the EU/US bilateral agreement (BASA) (see [here](#)), you can import an engine with a 'rebuilt' status in block 11, only when it has been released by the original engine manufacturer on a Form 8130-3 using the blocks 13a. to 13e. (left side).

Please note that Form 8130-3 with 'rebuilt' status are not acceptable for components other than engine (regardless whether it has been released on left or right side) therefore the components accompanying the rebuilt engine should either be released REPAIRED/OVERHAULED... (right side) or NEW (left side).
