Description

This year's Annual Safety Conference of the European Union Aviation Safety Agency (EASA) will focus on **Airport Safety & Environmental Sustainability through Innovation**.

Robust recovery and passenger demand in 2022 have put the spotlight on bottlenecks in the complex airport ecosystem, where many processes are very labour intensive. After being in the centre of the media attention last summer, this is a good time to showcase examples that improve safety in a more efficient and sustainable way. The Annual Safety Conference will feature high level speakers from airport operators, airlines, ground handling companies, air navigation service providers, manufactures, EU institutions and European Member States' competent authorities. They will share their experience and exchange strategic views exploring airside innovation in various panels:

- **Innovative tools for collaborative decision making** and a holistic approach to integrated safety management,
- **Smart airport safety solutions** based on artificial intelligence like sensors to report runway surface contamination and driverless vehicles,
- **Innovations in ground handling**, including ideas for more automation and application of new technologies,
- The future of **urban air mobility** and the integration of vertiports at aerodromes,

- Airports as key enablers and facilitators of ever **greener aircraft operations**.

The Conference is organised together with the Czech Presidency of the EU Council and will take place in Prague as an in-person event on 30 November and 1 December 2022.

Agenda

[Agenda Annual Safety Conference 2022](#)

Registration

Registration closed on 23/11/2022.

The registration fee amounts to €120. This includes the 1,5 day conference, 2 lunches and an evening reception as well as networking coffee breaks. Of course, you will also have the chance for networking and exchanges with other attendees at the event.

Note: *The Annual Safety Conference (ASC) Organising Committee will prioritise participants from EASA stakeholders, such as airlines, airports, air navigation service providers, ground handling organisations, personnel representative organisations and Member States' competent authorities. The ASC Organising Committee will review registrations and prioritise attendance in accordance with this policy before issuing a confirmation of registration.*

Accommodation & Travel

Participants are responsible for their own hotel accommodation and travel arrangements. However, EASA has made special arrangements with Orea Hotel Pyramida in Prague (the conference venue) for accommodation. Event participants can book their hotel room at the EASA special rate by following the link you will receive in the registration confirmation email.

Please note that this is a limited offer and the hotel cannot accommodate all participants!
