Description

The European Union Aviation Safety Agency (EASA) has published Notice of Proposed Amendment (NPA) 2024-05 - Conformity assessment — Establishment of a European certification/declaration system for safety-related aerodrome equipment.

To enhance the understanding of the interested parties, EASA is organising a webinar where it will provide detailed information about the proposed regulation and the next steps that will follow after the end of the public consultation.

Who should attend the webinar?

- EU and non-EU aerodrome equipment manufacturers providing European aerodromes with safety-related aerodrome equipment (e.g. lights; signs and markings, Docking Guidance Systems, aircraft arresting systems, FOD Detection Systems, avian radars, runway weather information systems (related to GRF), friction and weather measurement or information devices etc.)
- EU aerodrome operators
- Competent authorities

Audience questions and interactive polls will be managed using Slido.

Submit questions before the event by going to [Slido](#), enter code #EQUIP and passcode EASA

All persons interested in attending are requested to use their professional email addresses.

Event confirmation and the webinar link will only be provided only upon registration approval.
