VIRTUA — Blockchain for airworthiness in aviation – Developing Solutions and Strategies for Integrating Blockchain in Airworthiness Management

Online event

Organised by: EASA

Event Type: Workshop

Date:
24 Jan 2024
24/01/2024, 13:00 - 15:30 CET (UTC +1)

Description

As we continue our journey with the **EASA VIRTUA project**, we dive deeper into the potential of blockchain for airworthiness in aviation. Building on our December 13th session, we invite you to join us for the second workshop: 'Developing Solutions and Strategies for Integrating Blockchain in Airworthiness Management'.

Focus of the Workshop:

This session is dedicated to turning our initial discussions into actionable strategies. We will collaborate to create solutions that integrate blockchain technology into the fabric of airworthiness management. With expert insights from project partners and other industry experts.

What's on the Agenda:

- Strategy Development: We will outline strategies to tackle the challenges identified in our first session and explore how blockchain can be part of the solution.
- Solution Workshops: Engage in hands-on workshops where you will help to shape the solutions to implement.
- Expert Guidance: Receive valuable input on the practical steps towards integrating blockchain.
- Collaborative Planning: Work with peers to draft a roadmap for the future of blockchain in

aviation airworthiness.

Participants:

This workshop is for those who play a key role in aviation airworthiness, including maintenance specialists, aviation executives, compliance officers, blockchain developers, and lessors. Your expertise and perspective are crucial as we navigate this journey together.

Join us as we take the next step in transforming aviation with blockchain technology. Your involvement is key to our collective success.
