

# **FAQ n.19365**

## FAQs:

Specific Airworthiness Specifications, General Aviation

## **Question:**

How do I find out if my aircraft has an SAS or TC?

#### **Answer:**

The EASA aircraft lists can be found in the Product List page.

These lists specify whether the aircraft has a TC or SAS. This only applies for aircraft (including rotorcraft and lighter-than-air) but not to propulsion. If an engine or propeller becomes an orphan, there is no SAS.
