

FAQ n.19402

FAQs:

[Alternative Method of Compliance \(AMOC\) to an Airworthiness Directive \(AD\)](#)

Question:

Why have provisions for the approval of an AMOC with AD?

Answer:

Provisions for an 'Alternative Method of Compliance with an AD' are desirable from an aircraft operator's and a TC Holder's point of view when acceptable methods are developed for AD compliance if a limited number of aircraft are eligible to these acceptable methods (and no change to the AD is planned) or while awaiting a planned revision or supersedure of an AD.
