

European Union Aviation Safety Agency

## FAQ n.46836

### FAQs:

[CS-STAN](#), [General Aviation](#)

### Question:

**Does CS-STAN allow the installation of Garmin GNS devices?**

### Answer:

The main functionality of these devices is COM/NAV/GPS. CS-SC052b (GNSS equipment) allows the combination with CS-SC001 (COM) and CS-SC056 (NAV). Thus its installation can be considered eligible for CS-STAN. However, the limitations of CS-SC52b have to be respected. In particular, any connection with an autopilot is not permitted, since such use would go beyond the limitation to situational awareness only.
