PRINTED ON PROCESS CHLORINE-FREE RECYCLED PAPER (PCF)

Dear Reader,

We have had much positive feedback for the Part-M technical handbook, and we are therefore glad to be able to present to you the second value-added product in both print and electronic format: This Part-145 handbook is the second technical publication produced by EASA to meet the needs of its stakeholders in the aviation community. It comprises the implementing rules and the related AMC/GM of Part-145 in a consolidated format.

The printed versions of our technical handbook series include a CD with the bookmarked text to facilitate easier and faster reading. They are living documents, and as the rules evolve, the handbooks will be updated on a regular base. We are aiming to further enhance our products and hope to be able to provide our stakeholders with products that will successively improve both in quality and timeliness.

This current version includes the latest amendments that were introduced by Reg. EU No 127/2010, ED Decision 2010/002/R, ED Decision 2010/006/R, and Reg. EU No 962/2010.

Cologne, November 2010

Patrick Goudou
Executive Director, EASA

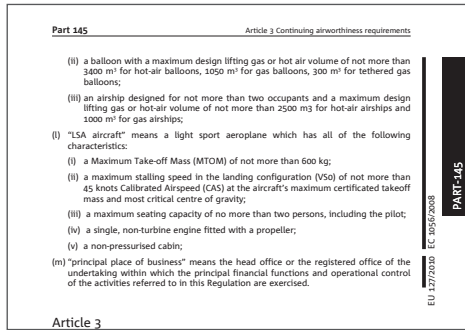

Disclaimer

This Part-145 consolidated version has been prepared by the Agency in order to provide stakeholders with an updated and easy-to-read publication. It has been prepared by combining the officially published corresponding text of the regulation, and all amendments together with the acceptable means of compliance and guidance material adopted so far. However, this is not an official publication and the Agency accepts no liability for damage of any kind resulting from the risks inherent in the use of this document.

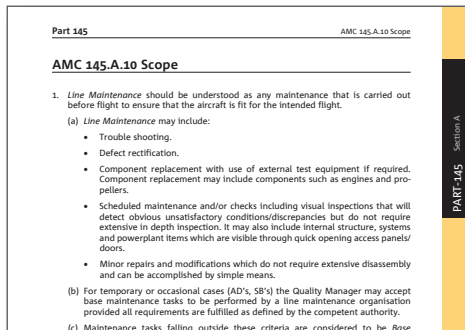

Officially published documents, used to amalgamate all the elements into this consolidated version, may be found on the Agency's webpage www.easa.europa.eu

The format of this publication has been adjusted in order to make it easier to read and for reference purposes. Readers are invited and encouraged to report to rule@easa.europa.eu any perceived errors, or comments relating to this publication.
