

# **Personnel requirements**

# Can a certification maintenance requirement (CMR) be performed by the Flight Crew before flight?

#### **Answer**

Normally the flight crew should not release CMR task unless that task is included in a "repetitive pre-flight airworthiness directive" under the conditions of 145.A.30(j)(3), M.A.606(h) (1) or CAO.A.040(c)(1)

In case of aircraft operated away from a supported location, the provisions of 145.A.30(j)(4), M.A.606(h)(2) or CAO.A.040(c)(2) could be used for CMRs as long as all the applicable conditions are met. In particular:

- sufficient practical training has been carried out.
- there is a procedure in the Maintenance Organisation Exposition, Maintenance Organisation Manual or Combined Airworthiness Exposition (CAE).

the task is considered "minor maintenance or a simple check" (AMC 145.A.30(j)(4) point 2(i) or AMC M.A.606(h)(2) point 2).

## What is the meaning of the Protected Rights in the Appendix IV to Part-145?

#### **Answer**

The protected rights mentioned in paragraph 2(a) of the Appendix IV to Part-145 were included in the Regulation 2042/2003 for the persons who were already working in a Part-145 organisation in a location situated outside the EU before the entry into force of Part-66. These protected rights allowed those persons to continue exercising (inside that particular Part-145 organisation) the privileges of the certification authorisation issued by that Part-145 organisation without the need to comply with paragraphs 1(c) to 1(f).

If this person changed the employment to a different Part-145 approved organisation after the

entry into force of Part-66 (i.e. 28 November 2003), the previous certification authorisation is not valid and he/she needs to receive a new one from the new Part-145 approved organisation. In this case paragraph 2 of Appendix IV is not applicable anymore.

This implies that any new or extended authorisation granted by AMOs to their C/S after the entry into force of Part-66 must comply with paragraphs 1(c) to 1(f) in particular regarding the type training certificates.

# What are the training requirements for personnel within a Part-145 organisation, other than those contained in Part-66?

#### **Answer**

Requirement	Reference
The accountable manager shall demonstrate a basic understanding of Part-	145.A.30(a)
145.	point 3.
The person or group of persons nominated responsible for ensuring that the	
organisation complies with Part-145 (including the Quality Manager) shall be able	145.A.30(b)
to demonstrate	point 3.
relevant knowledge, background and satisfactory experience related to	
aircraft or components maintenance as applicable,	
a working knowledge of Part-145,	

involved in any maintenance, airworthiness review management and/or quality audits in accordance with a procedure and to a standard agreed by the competent authority.  In addition to the necessary expertise related to the job function, competence must include an understanding of the application of human factors and human performance issues appropriate to that person's function in the organisation.  This should include also:  • Fuel Tank Safety training (AMC3 145-A-30(e) and Appendix IV to AMC 145.A.30(e) and 145.B.10(3)).  • EWIS training (AMC 20-22)  The organisation shall ensure that personnel who carry out and/or control a continued airworthiness non-destructive test of aircraft structures and/or components are appropriately qualified for the particular non-destructive test in accordance with the European or equivalent Standard recognised by the Agency.  Personnel who carry out any other specialised task shall be appropriately qualified in accordance with officially recognised Standards.  By derogation to this paragraph those personnel specified in paragraphs (g) and (h)(1) and (h)(2), qualified in category B1, B3 or L in accordance with Annex III (Part-66) may carry out and/or control colour contrast dye penetrant tests.  By derogation to paragraphs (g) and (h), in relation to the obligation to comply with Annex III (Part-66), the organisation may use certifying staff qualified in accordance with the following provisions:  1. For organisation facilities located outside the Community territory certifying staff may be qualified in accordance with the national aviation regulations of the State in which the organisation facility is registered subject to the conditions specified in Appendix IV to this Part.  2. For line maintenance carried out at a line station of an organisation which is located outside the Community territory, the certifying staff may be qualified in accordance with the national aviation regulations of the State in which the line station is based, subject to the conditions specified in Appendi		rage 3 01 0
audits in accordance with a procedure and to a standard agreed by the competent authority.  In addition to the necessary expertise related to the job function, competence must include an understanding of the application of human factors and human performance issues appropriate to that person's function in the organisation.  This should include also:  • Fuel Tank Safety training (AMC3 145-A-30(e) and Appendix IV to AMC 145.A.30(e) and 145.B.10(3)).  • EWIS training (AMC 20-22)  The organisation shall ensure that personnel who carry out and/or control a continued airworthiness non-destructive test of aircraft structures and/or components are appropriately qualified for the particular non-destructive test in accordance with the European or equivalent Standard recognised by the Agency.  Personnel who carry out any other specialised task shall be appropriately qualified in accordance with officially recognised Standards.  By derogation to this paragraph those personnel specified in paragraphs (g) and (h)(1) and (h)(2), qualified in category B1, B3 or L in accordance with Annex III (Part-66), the organisation may use certifying staff qualified in accordance with the following provisions:  1. For organisation facilities located outside the Community territory certifying staff may be qualified in accordance with the national aviation regulations of the State in which the organisation facility is registered subject to the conditions specified in Appendix IV to this Part.  2. For line maintenance carried out at a line station of an organisation which is located outside the Community territory, the certifying staff may be qualified in accordance with the national aviation regulations of the State in which the line station is based, subject to the conditions specified in Appendix IV to this Part. this Part.	accordance with the national aviation regulations of the State in which the	I .
3. For a repetitive pre-flight airworthiness directive which specifically states that	line station is based, subject to the conditions specified in Appendix IV to	
	line station is based, subject to the conditions specified in Appendix IV to this Part.	

the flight crew may carry out such airworthiness directive, the organisation may issue a limited certification authorisation to the aircraft commander and/or the flight engineer on the basis of the flight crew licence held. However, the organisation shall ensure that sufficient practical training has been carried out to ensure that such aircraft commander or flight engineer can accomplish the airworthiness directive to the required standard.

145.A.30(j) and associated AMC/GM.

4. In the case of aircraft operating away from a supported location the organisation may issue a limited certification authorisation to the commander and/or the flight engineer on the basis of the flight crew licence held subject to being satisfied that sufficient practical training has been carried out to ensure that the commander or flight engineer can accomplish the specified task to the required standard. The provisions of this paragraph shall be detailed in an exposition procedure.

Appendix IV to Part-145.

- 5. In the following unforeseen cases, where an aircraft is grounded at a location other than the main base where no appropriate certifying staff are available, the organisation contracted to provide maintenance support may issue a one-off certification authorisation:
- to one of its employees holding equivalent type authorisations on aircraft of similar technology, construction and systems; or
- (ii) to any person with **not less than five years maintenance experience and holding a valid ICAO aircraft maintenance licence rated for the aircraft type requiring certification** provided there is no organisation appropriately approved under this Part at that location and the contracted organisation obtains and holds on file evidence of the experience and the licence of that person.

All such cases as specified in this point shall be reported to the competent authority within seven days of the issuance of such certification authorisation. The organisation issuing the one-off authorisation shall ensure that any such maintenance that could affect flight safety is re-checked by an appropriately approved organisation.

	Page 5 of
In addition to the appropriate requirements of 145.A.30(g) and (h), the	
organisation shall ensure that certifying staff and support staff have an <b>adequate</b>	  145.A.35(a)
understanding of the relevant aircraft and/or components, or both, to be	and AMC
maintained and of the associated organisation procedures. In the case of	145.A.35(a)
certifying staff, this shall be accomplished before the issue or reissue of the	1 10.7 1.00(4)
certification authorisation.	
The organisation shall ensure that all certifying staff and support staff are involved	145.A.35(c)
in at least six months of actual relevant aircraft or component maintenance	and AMC
experience in any consecutive two-year period.	145.A.35(c)
The organisation shall ensure that all certifying staff and support staff receive	145.A.35(d)
sufficient continuation training in each two-year period to ensure that such	and AMC
staff have up-to-date knowledge of relevant technology, organisation	145.A.35(d)
procedures and human factor issues.	143.71.00(0)
The organisation shall establish a programme for continuation training for	
certifying staff and support staff, including a procedure to ensure compliance with	145.A.35(e)
the relevant paragraphs of 145.A.35 as the basis for issuing certification	and AMC
authorisations under this Part to certifying staff, and a procedure to ensure	145.A.35(e)
compliance with Annex III (Part 66).	
Except where any of the unforeseen cases of 145.A.30(j)(5) apply, the	
organisation shall assess all prospective certifying staff for their competence,	145.A.35(f)
qualification and capability to carry out their intended certifying duties in	and AMC
accordance with a procedure as specified in the exposition prior to the issue or	145.A.35(f).
reissue of a certification authorisation under this Part.	
The holder of a category A aircraft maintenance licence may only exercise	
certification privileges on a specific aircraft type following the satisfactory	
completion of the relevant category A aircraft task training carried out by an	145.A.35(n)
organisation appropriately approved in accordance with Annex II (Part-145) or	
Annex IV (Part-147). This training shall include practical hands on training	and AMC
and theoretical training as appropriate for each task authorised. Satisfactory	145.A.35(n)
completion of training shall be demonstrated by an examination or by workplace	
being the first and the second of the second	1
