

Webinar, 01 March 2023

BACKGROUND

Following the adoption of ICAO methodology for assessing and reporting runway surface conditions, known as the Global Reporting Format (GRF), and its transposition into the EU regulatory framework, including its recent amendment introduced in 2022, EASA organises a webinar for all its stakeholders, both industry and NCAs.

The intent of this event is to provide a forum where all different stakeholders can share their GRF implementation experiences, provide and discuss ideas and suggestions from all different aviation domains and perspectives, with a view to further improving the implementation of the regulatory framework, and where necessary enhancing it, as well as promoting relevant best practices and ideas, across the EU and beyond.
